Troubleshooting

This chapter summarises the most common problems you could encounter with the appliance. If you are unable to solve the problem with the information below, contact the Consumer Care Centre in your country.

Problem	Possible cause	Solution
The shaver does not shave as well as it used to.	The shaving heads are damaged or worn.	Replace the shaving heads (see chapter 'Replacement').
	Long hairs obstruct the shaving heads.	Clean the shaving heads one by one (see section 'Cleaning the shaving unit with the cleaning brush' in chapter 'Cleaning and maintenance').
	You have not inserted the shaving heads properly.	Make sure that the projections of the shaving heads fit exactly into the recesses (see section 'Cleaning the shaving unit with the cleaning brush').
The shaver does not work when I press the on/off button.	The rechargeable battery is empty.	Recharge the battery (see chapter 'Charging') or connect the shaver to the mains.
	The temperature of the shaver is too high. In this case, the shaver does not work.	As soon as the temperature of the shaver has dropped sufficiently, you can switch on the shaver again.
